

Hummingbird®

ICP Monitoring

When **accuracy** and **ease of use** matter,
Hummingbird is your **ONLY** choice.

Hummingbird delivers a unique approach to advanced neuromonitoring by offering:

- The **only in-vivo parenchymal monitoring** sensor that can be **rezeroed in-situ** with **zero drift**.
- The **most accurate parenchymal ICP measurement**¹, independent of patient positioning.
- Drainage system with **Multimodal Monitoring through a single access point**, providing parenchymal ICP measurement, CSF drainage and two additional brain probes via one bolt.
- Easy-to-use **ICP control module seamlessly transmits ICP reading to the patient monitor**.

**Hummingbird Solo
ICP Monitoring**

**Hummingbird Quad
ICP Monitoring
with Drainage**

**Hummingbird
ICP Control Module**

The only ICP monitor with ZERO DRIFT

Only Hummingbird ICP monitoring technology demonstrated zero clinically relevant drift when compared to other leading competitors.

ICP Monitoring Device	Drift
Integra® Camino® Flex Ventricular Bolt Pressure Monitoring Kit ²	± 2 mmHg per 24-hour period ± 1 mmHg per day after initial 24-hours
Codman ICP Express and Microsensor ³	± 5 mmHg over 30 days
IRRAS Hummingbird SynergyDuo Ventricular	± 0.15 mmHg over the entire course of treatment⁴

HUMMINGBIRD ORDERING INFORMATION

Product #

Product Name

Product Description

HUMMINGBIRD BOLT-BASED MONITORING SYSTEM

H110

Hummingbird Solo ICP Monitoring

Bolt-Based system that combines both access and parenchymal ICP measurement.

HUMMINGBIRD MULTIMODAL MONITORING SYSTEM

H610

Hummingbird Quad ICP Monitoring with Drainage

Multimodal Monitoring system that combines access through a single twist-drill hole, providing CSF drainage, parenchymal ICP monitoring, and your choice of two probes.

HUMMINGBIRD ICP CONTROL MODULE

HICP200

Hummingbird ICP Control Module

Control module that transmits needed ICP data from Hummingbird catheter to patient monitor.
